

## THE PROBLEM

Not everything transported in the cabin of an aircraft has its safe place. Many objects normally don't fit into drawers, cabinets, dog houses or hat racks. Therefore, why not simply put bags and packages on an empty seat?

Because it is not safe without safiXproaero!

## THE SOLUTION

safiXproaero is a simple, affordable and highly effective solution for a latent safety problem. This belt system is easily adjustable to the size of most catering containers, crew bags or other items. User friendly buckles hold the belts together. This smart product is engineered for aviation.

# SAFIXPRO

AERO

## STANDARDS AND SPECIFICATIONS

The buckles are made of stainless steel, retaining a max. load of 9,5kN.

The belts are made of high quality, flame retardant polyamid fibre with a tensile strength of up to 20kN.

The entire system weights only 0,7kg and secures an item of max. 17kg.

Safety standards defined by ICAO, JAA and FAA are met. Passengers and crew are protected.

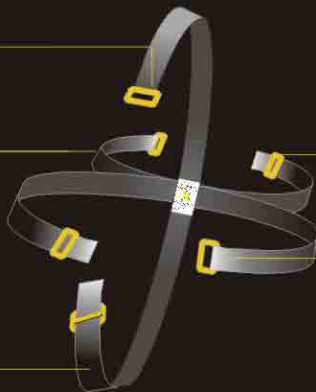

ICAO Annex 6

Part I 4.8/Part II 4.4.1 e) - JAR-OPS 1.270 - FAR 121.576, 121.577.

## INSTRUCTION FOR USE

safiXproaero delivers its full potential only in combination with installed seat belts.

- 1/ Install belt 1 around the backrest of the seat.
- 2/ Close the seatbelt over belt 2.
- 3/ Place the object to be secured on the seat over belt 2.
- 4/ Close all remaining belts tightly.

safiXproaero special use restraint harness is an easy to use device. The design enables to close and open individually each belt. (Check for belt end identifier markings.)

Except for take off and landing you can keep one belt open to have free access to the content of your bag or container.

## WARNINGS AND LIMITATIONS

- Do not use for persons or animals -
- Do not use over sharp edges - Do not use damaged or contaminated belt.
- Avoid contact of belt with oil or grease - Only for use inside vehicles
- Do not use in emergency exit areas.
- Use installed safety belts as instructed-Read instructions before use - Check for correct assembly of link and 3-bar adjuster.

safiXproaero is a patented design, manufactured in Switzerland to the highest standards. Each safiXproaero system undergoes strict quality control measures. Check for stamp on label. Use this product at your own risk.
